DESIGN INTENT:

The !Q Tour Edition has been the smart choice for a controllable ball motion for well over 10 years. With unwavering reliability, the !Q Tour Edition performs at a high level on virtually any medium condition you can throw at it. The more than proven R2S solid cover is perfectly prepped at 4000-grit Abralon. Sitting right in the middle of our cover strength spectrum, R2S give you the perfect balance of length and a consistent backend motion. The C³ Centripetal Core is engineered to yield ample mid-lane roll while smoothing out the transition. This fast-revving symmetrical shape is unique in it's mass distribution and is able to stay on-line longer than other lower RG offerings. This legendary core/cover combo creates a new level of versatility and one of the most forgiving shapes of all time.
